# 75 years of innovation

Founded in Australia in 1947, Zip Water has always been innovators. For decades, we have been advancing and perfecting our drinking water systems globally and we are thrilled to finally offer the HydroTap by Zip Water in North America!

See why we are leading the way in performance and functionality:

POWERED BY  
**G5**  
TECHNOLOGY

## MicroPurity™ filtration

Our proprietary, built-in 0.2 micron filter is certified to NSF standards to provide pure-tasting, filtered water.

## Air-cooled system

Our unique air-cooled refrigeration system allows our systems to be 100% water efficient.

## PowerPulse technology

Our innovative Zip Water PowerPulse technology maintains stored boiling water to within 1-2° of your set temperature, meaning no energy or time is wasted waiting for water to boil.

## Auto-diagnostics

An advanced auto-diagnostics system continuously monitors your HydroTap's performance.

## Unique safety features

Our HydroTap systems are designed to deliver boiling water smoothly to minimize splashing. Additionally, our taps include a safety lock that must be activated before dispensing boiling water.

## Smart customization

Our newly optimized menu in the G5 HydroTap command center allows you to select energy modes and usage settings for easier customization.

# The safe and sustainable choice

Zip Water continues to invest in sustainable product development having recently released an internationally recognized and independently verified EPD for its HydroTap products.

Developed with leading sustainability consulting company, Thinkstep, Zip Water achieved the first EPD for an electrical product of its type in Australia, New Zealand and neighboring Pacific islands, clearly demonstrating Zip Water's innovative and forward-thinking approach.

## The Life of the HydroTap

## Maintenance, warranty and aftercare

It's important to perform routine maintenance on your HydroTap to keep it running at peak performance. This includes changing the filter at least once per year and monitoring your CO<sub>2</sub> levels for our BCS and CS models.

To make it easy, Zip Water offers optional installation and preventative maintenance programs (including filter & CO<sub>2</sub> changes) as well as warranty repairs, all provided by our own certified technicians and third-party partners.\*

What's more, your HydroTap system is backed by a comprehensive parts and labor warranty.

HYDROTAP COMMERCIAL

# TECHNICAL INFORMATION

# Installation Requirements

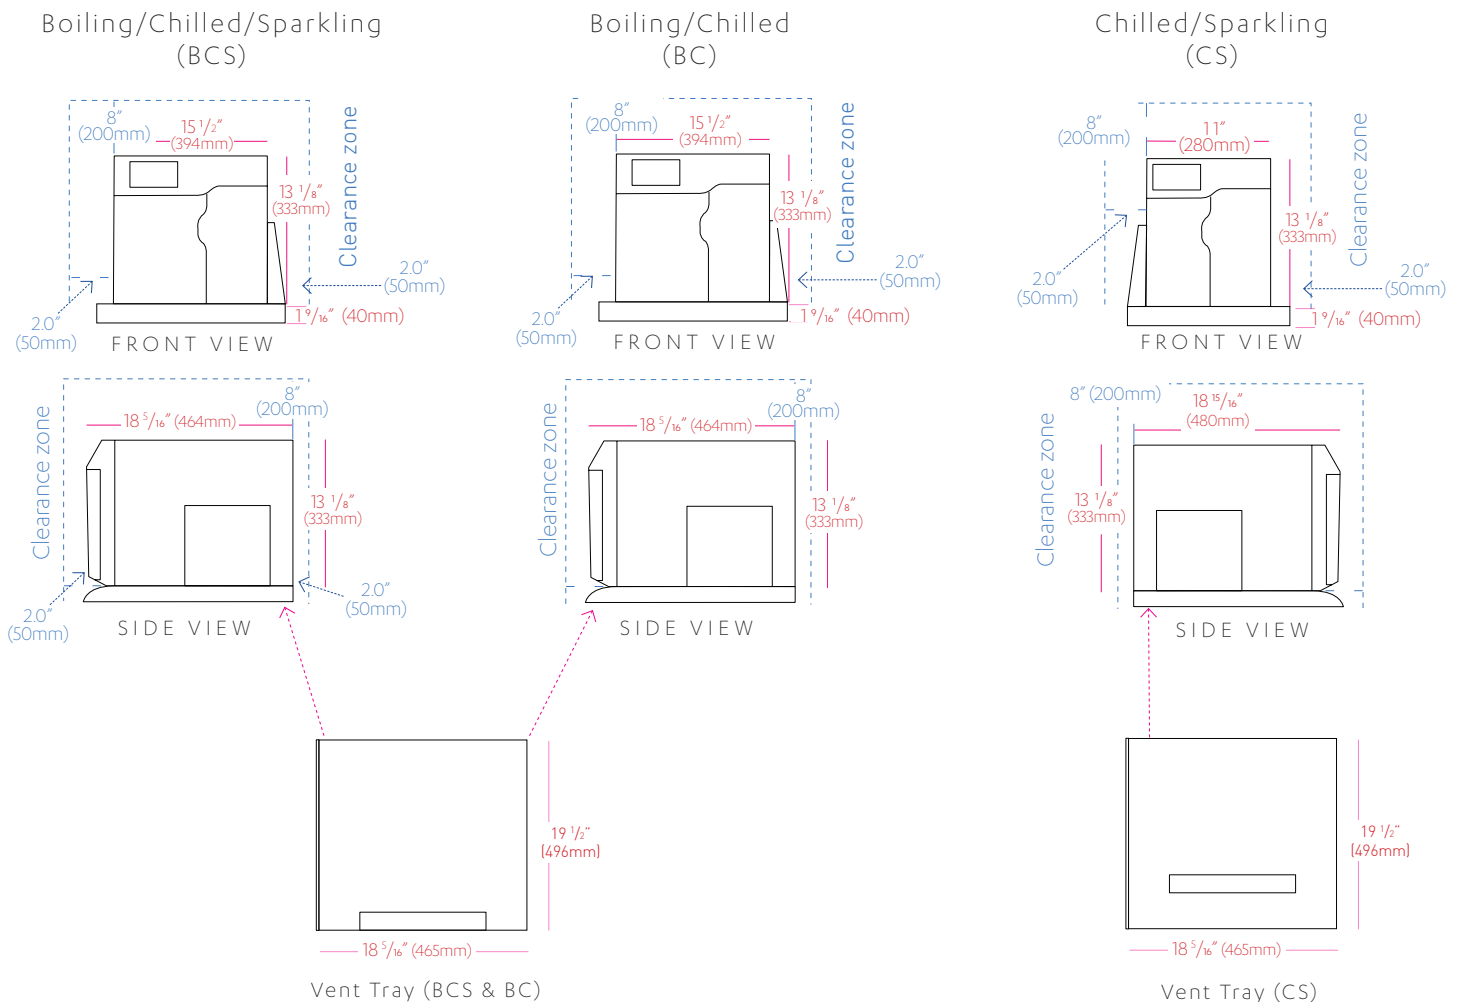

**Power:** 1 x 220 – 240V, 50-60Hz, power supply power supply with Nema 6-15 outlet

**Water:**

- 1 x 1/2" BSP water connection with isolation valve for Arc Plus, Cube Plus, Elite Plus and Classic Plus models
- 2 x 1/2" BSP water connection with isolation valve for all Celsius models
- Water pressure: 37 – 100 psi / 2.60 - 7.03kg/cm<sup>2</sup> / 250-270kPa
- Minimum flow rate: 1 gpm / 3.79 lpm
- Optimal Total Dissolved Solids (TDS) range: 50ppm (absolute minimum) – 150ppm

**Ventilation:** The HydroTap system is air-cooled so discrete cabinetry cut-outs are required for ventilation. We also recommend the use of ventilation trays which are included with our G5 240V units. Additionally, the unit must have a minimum of 2" (50mm) clearance on left and right side and 8" (200mm) above for proper ventilation.
